Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Yawata pointed out that two data streams (decoding and rendered data) are sent from the server to the printer and the printer uses the decoding data to decode the rendered data, whereas Mitchell teaches one data stream (compressed data) being received by the printer which yields, via the decoder, another single data stream (reconstructed image data). The examiner agreed with the Applicant's remarks. Upon filing the response, the rejection of Kadowaki in view of Mitchell would be withdrawn.
